

Charles Kendall

PRODUCT LOGISTICS REWORKING & FULFILLMENT

PRODUCT LOGISTICS FOR GROCERY AND NON-GROCERY BRANDS

CONTRACT PACKING, PRE-MARKET PREPARATION AND E-COMMERCE FULFILLMENT

At Charles Kendall, we can carry out a full range of rework and fulfillment activities tailored to your requirements.

Our Product Logistics service includes contract packing and e-commerce fulfillment for both grocery and non-grocery brands.

As well as our reworking services, we can cover all your supply chain requirements; from air, ocean, road and rail freight, to compliance, warehousing and distribution.

From fast moving consumer goods to high end luxury items, we have years of experience in a wide range of industry sectors. We work to reducing your risks and costs in the supply chain to reach new markets and increase your sales.

INDUSTRY EXPERIENCE

Retail Food & Drink

Wide range of food and drink based experience. Cans bottles, boxes, tubs, pouches and trays. Made from plastic, foil, glass or cardboard – we've prepared them all.

Liquor & Tobacco

Alcoholic and tobacco based products are subject to special shipping requirements as well as regulations for storage and retailing which we can help with.

Homecare

Detergents, tablets, waxes and all manner of cleaning bottles, tins and sprays. Aerosols are no trouble too as our machinery can work well within heat safety limits.

Health & Personal Care

From soap to sun cream. Bring us your cosmetic, dental, hair and pharmacy products. Lotions, creams, balms, scrubs, powders and pastes. We know and love them all.

Toys

Toys and gifts of all kinds, can be highly seasonal and varies vastly in size and packaging materials used. Promotional packs are no problem too.

Tools & Furnishings

DIY and hardware goods including fixtures and fittings for home and business. We've worked with plumbing and other tool and furnishing brands.

Consumer Electronics

Phones, tablets, fitness devices, scales, speakers, consoles, or even larger white goods like washing machines, dishwashers and fridges.

Petcare

Not just dog and cat food in cans, bags, tubs and pouches but a host of other pet products like flea & worm treatments, leads, collars and chews.

BRAND TO RETAIL CONTRACT ACTIVITIES

We can carry out a full range of rework activities, adding value back into the supply chain for all FMCG products, both grocery and non-grocery sector.

Ink Jetting / Date Coding

Our ink-jetting machines can be programmed to place additional information such as expiry dates, date of manufacture, country-of-origin and serial numbers onto most product packaging, with a fast turnaround guaranteed.

Labelling & Sticking

Over-labelling, re-labelling and label generation; we can print the label depending on the product type and specific requirements. Our team will design, source and apply bespoke company labels, applying them by either machine or manual hand-application.

Blister Packing

Blister packs create a cavity or pocket for the product to be sealed into, commonly used for small goods like batteries and pills. We have the capability to carry out several types of pre-formed plastic blister packing and can mould different cavities according to the size required.

Promotional Packing

Promotional packs are combinations of product lines, often used for a sales offer and during seasonal holidays or special events. We can devise a solution for your market suited to the product(s) types. We can include pack design, printing, storage, and delivery to destination.

Pouching & Sampling

We have packed millions of units in pouches and are capable of high volumes in our facilities. We can print the pouches with the design of your choice and to any size and shape required.

Bulk to Retail

Breaking down bulk items into customer specific counted or weighed quantities. We can carry out bulk to retail orders for many clients, taking in bulk delivery and then separating and re-packing the product to customer requirements for quantity and size.

Shrink Sleeve Wrapping

A contract packing service; shrink sleeve wrapping is a flexible plastic film that will shrink tight around most products and can be used to collate a number of small to medium products in a single pack. Shrink wrapping can also improve the cosmetic appearance of your products.

Pick & Pack/ Fulfillment

We provide a complete pick, pack and fulfillment service. From receiving and storage, to hand-picking and packing before efficiently shipping to the end customer. We can design and supply packaging to requirements or use your own branded packaging.

Language Translation

Many countries require translated labelling information into the local or dual language. Even without a legal requirement most brands find this a necessary process to satisfy consumer expectations. We have converted many products for Arab language consumers.

Manual Rework

There are many packing projects where machine production is not feasible, so manual packing is the most cost-effective answer. We offer a comprehensive service to ensure your product gets to market on time and resolve any quality discrepancies that may have arisen.

Pack Design

Our skilled in-house team can provide design services for just about kind of packaging and labelling material you require.

E-COMMERCE FULFILLMENT

We are a HMRC registered fulfillment house at several locations in the UK, which means we can offer a fully compliant pick & pack solutions for our customers in both B2B and B2C retail. By providing a complete end to end solution, our goal is to minimise the cost per order so our customers can concentrate on sales, marketing and growing their business.

Handling both grocery and non-grocery items, our experienced Logistics department specialise in e-commerce fulfillment, ranging from start-up size to large multi-national companies. Goods range from high end bathroom and kitchen accessories, electronic equipment, to cosmetics and fragrance.

We are experienced in handling high value brands which require extra care and attention to detail. No matter your requirement, we've got it covered.

We currently handle a range of rework activities for our clients including pick & pack, re-labelling and software re-flashing. We also offer web store development and hosting with a range of cost packages tailored to the customers needs.

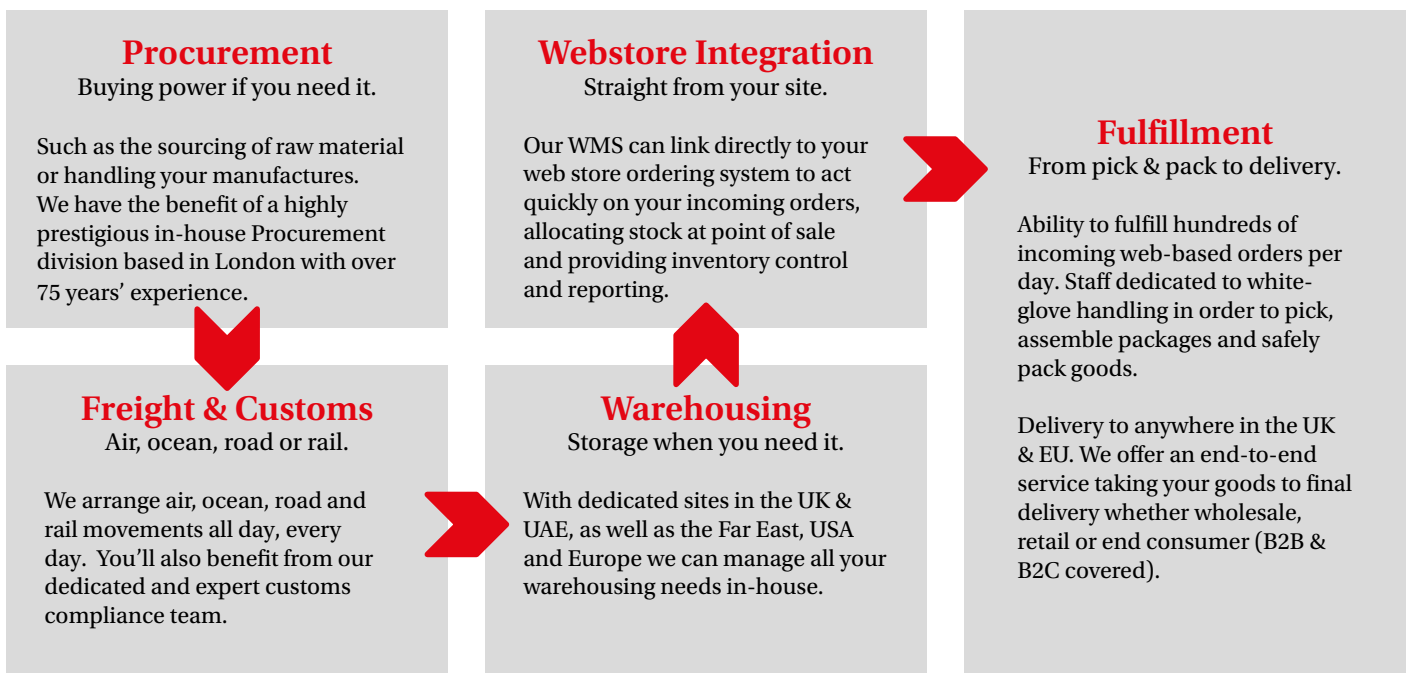

Our WMS is capable of fully integrating with an online webstore. Allocating stock at point of sale and creating a pick for the warehouse ensuring inventory is correct and accurate. Customers are able to view inventory and transactions online, pulling data for reporting and analysis.

We can handle your full supply chain process from supplier, shipping, fulfilment and delivery B2B or B2C. By providing a complete end to end solution, our goal is to minimise the cost per order so customers can concentrate on growing their business.

FREIGHT & COMPLIANCE

As a registered freight forwarder all the usual global freight services for import and export are naturally at your fingertips.

As well as our reworking services, we can cover all your supply chain requirements; from air, ocean, rail and road freight to compliance, warehousing and distribution.

Freight forwarding has been at the heart of Charles Kendall's business since the 1950s so you can rest assured of a smooth logistical service through the rest of your supply chain.

Import and export services including clearance, freight and warehousing are available from our global locations in the Middle East, Europe, China and the USA.

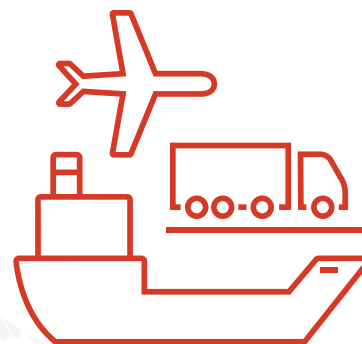

With decades of experience across global trade routes and with the highest level of AEO certification, we are trusted by HMRC.

AIR

- Consolidated direct air services to and from all major global markets via our four UK Air Gateways
- Enhanced Temporary Storage Facility (ETSF) approved warehouses allowing speedy removal of non-customs-cleared import cargo to our UK sites, for timely import clearance.
- All locations hold New Computerised Transit System (NCTS) approved consignee and consignor status, enabling us to receive and load cargo under T1 transit status outside the EU.
- High levels of security in offices and warehouses ratified by our AEO safety and security approval.
- Air charter specialists which is important when commercial airline capacity is limited.

OCEAN

- Full Container Load (FCL) with flexible transit times and routings, space and equipment guarantees and door to door services available we can cover your shipping requirements around the world.
- Less than Container Load (LCL) with weekly scheduled services to and from all key worldwide gateways.
- Own NVOCC (non-vessel operating common carrier) called Seabox offering frequent sailing times, competitive rate and a tailored services across all carriers.
- Breakbulk & Out-of-Gauge cargo including conventional and Ro-Ro services as well as specialist in part and full charter movements.

Fully supported by:

- Packing/casemaking for export from the UK
- Export and import customs clearance documentation services; including letters of credit, certificates of origin and legalisation
- Road collection and delivery services
- Cargo Insurance
- DGSA-approved staff to handle dangerous goods at all locations
- Excellent relationship with key carriers. Our preferred-partner-system manages performance in line with ISO requirements.
- Direct electronic access to customs using any Customs Service Provider (CCS, CNS, FCP)
